PROJECTS

NoteBook Web App

- A user-friendly web application designed for organizing and managing notes effectively.
- Implemented user authentication to ensure secure access
- Features the ability to create subject folders, enabling users to categorize their notes by topic.
- Within each folder, users can add individual topics and create detailed notes for each topic, with the option to either print the notes or save them as a PDF for future reference.

Techstack- React ,Express,Node ,MongoDb

Admin Dashboard

- Only authorized users can log in, with JWTs validating user access to protected routes.
- Allows users to add, view, update, and delete employees in a sortable table.
- Uses Redux to manage application state, ensuring consistency across components and improving maintainability
- A user-friendly, responsive layout with form validation, error handling, and alerts for CRUD actions.
- Express.js provides secure API endpoints, and MongoDB stores user and employee data with password hashing.

Techstack- React ,Express,Node ,MongoDb
